CERTIFICATE OF INDEPENDENT BID DETERMINATION

- 1 This Municipal Bidding Document (MBD) must form part of all bids¹ invited.
- 2 Section 4 (1) (b) (iii) of the Competition Act No. 89 of 1998, as amended, prohibits an agreement between, or concerted practice by, firms, or a decision by an association of firms, if it is between parties in a horizontal relationship and if it involves collusive bidding (or bid rigging).² Collusive bidding is a *pe se* prohibition meaning that it cannot be justified under any grounds.
- 3 Municipal Supply Regulation 38(1) prescribes that a supply chain management policy must provide measures for the combating of abuse of the supply chain management system, and must enable the accounting officer, among others, to:
 - a. take all reasonable steps to prevent such abuse;
 - b. reject the bid of any bidder if that bidder or any of its directors has abused the supply chain management system of the municipality or municipal entity or has committed any improper conduct in relation to such system; and
 - c. cancel a contract awarded to a person if the person committed any corrupt or fraudulent act during the bidding process or the execution of the contract.

- 5 In order to give effect to the above, the attached Certificate of Bid Determination (MBD9) must be completed and submitted with the bid:
 - ¹ **Includes price quotations, advertised competitive bids, limited bids and proposals.**
 - ² **Bid rigging (or collusive bidding) occurs when businesses, that would otherwise be expected to compete, secretly conspire to raise prices or lower the quality of goods and / or services for purchasers who wish to acquire goods and / or services through a bidding process. Bid rigging is, therefore, an agreement between competitors not to compete.**

SCOPE OF WORK

The pump inventory of the resorts broadly consists of the following:

- Submersible pumps (boreholes)
- Swimming pool pumps
- Hot & cold water pumps
- Above-ground pumps
- Sewerage pumps

At the Calitzdorp Spa the main water supply originates from two boreholes on the premises. This water is transferred into a large reservoir by means of submersible pumps from which it gravitates to all the sections of the resort.

The hot mineral water is transferred from the source (at a temperature of 52°C) to three swimming pools by means of three individual pumps. The hot mineral water of the three pools is recycled and collected in the old swimming pool. From there it is pumped to two other reservoirs to be utilized for irrigation purposes by means of gravitation.

At De Hoek the main water supply comes from the river from which water can be utilized according to a water schedule.

Please note the following challenges pertaining to the water quality at each resort:

Water Quality: Calitzdorp Spa:

The high iron content particularly poses a need for a good maintenance plan in order to sustain quality water delivery continuously.

The hot mineral water, 52°C at the source, and abnormally high iron content have an adverse effect on the pump equipment.

Water Quality: De Hoek Mountain Resort:

The fresh water contains no known chemicals that effects pumps. Natural contamination poses a challenge.

The scope of the tender is as follows:

1. Repairs to pumps in the event of breakage;
2. Bi-annual maintenance of pumps on the premises
3. Repair Electrical breakages when needed on all premises of GRDM
