CERTIFICATE OF INDEPENDENT BID DETERMINATION

1. This Municipal Bidding Document (MBD) must form part of all bids¹ invited.
2. Section 4 (1) (b) (iii) of the Competition Act No. 89 of 1998, as amended, prohibits an agreement between, or concerted practice by, firms, or a decision by an association of firms, if it is between parties in a horizontal relationship and if it involves collusive bidding (or bid rigging).² Collusive bidding is a *pe se* prohibition meaning that it cannot be justified under any grounds.
3. Municipal Supply Regulation 38(1) prescribes that a supply chain management policy must provide measures for the combating of abuse of the supply chain management system, and must enable the accounting officer, among others, to:
 - 3.1 take all reasonable steps to prevent such abuse;
 - 3.2 reject the bid of any bidder if that bidder or any of its directors has abused the supply chain management system of the municipality or municipal entity or has committed any improper conduct in relation to such system; and
 - 3.3 cancel a contract awarded to a person if the person committed any corrupt or fraudulent act during the bidding process or the execution of the contract.
4. This MBD serves as a certificate of declaration that would be used by institutions to ensure that, when bids are considered, reasonable steps are taken to prevent any form of bid-rigging.
5. In order to give effect to the above, the attached Certificate of Bid Determination (MBD9) must be completed and submitted with the bid:

¹ Includes price Tenders, advertised competitive bids, limited bids and proposals.

² Bid rigging (or collusive bidding) occurs when businesses, that would otherwise be expected to compete, secretly conspire to raise prices or lower the quality of goods and / or services for purchasers who wish to acquire goods and / or services through a bidding process. Bid rigging is, therefore, an agreement between competitors not to compete.

SCOPE OF WORK: DESCRIPTION OF THE WORKS Employer's objective:

The objective is to include servicing, maintenance, repairs, alterations, relocation and minor new installation to the plumbing infrastructure at all the above mentioned buildings including those there are on lease agreements in a sustainable manner while ensuring compliance to general safety and all relevant legislation.

Overview of the works:

The service provider will be responsible for the servicing, maintenance, repairs, alterations, relocation and minor new installation of the Plumbing Infrastructure.

The work will be done under the following maintenance types:

- Planned Preventative Maintenance;
 - Corrective Maintenance;
 - Predictive maintenance or condition based maintenance;
 - Proactive maintenance or engineer out maintenance;
 - Unplanned Maintenance-Breakdown Maintenance; and
 - Minor/smaller approved Project related Maintenance work
- Maintenance Types Defined:
- Preventative maintenance (FTM – Fixed Time Maintenance), defined as the type of maintenance where repairs or replacement actions are performed at predetermined, fixed, intervals to prevent failures from becoming reality.
 - The important issue with FTM (Fixed Time Maintenance) is that the mean-time between-failures (MTBF) be known in order to determine the most cost-effective frequency for maintenance or replacement. The frequency for action is best determined through accurate history keeping and failure recording. Random frequencies can lead to over-maintaining at high cost. For FTM to be technically feasible, the life must be known.
 - Corrective maintenance is defined as the activity following a preventative maintenance inspection, test or condition assessment with the purpose of correcting a problem or restoring the condition before failure

 - Predictive maintenance or condition based maintenance (CBM), defined as the type of maintenance trying to predict the condition of the equipment and plan maintenance strategy accordingly. Once the condition is known a decision is taken to take the equipment out of service for repairs or to leave it in service for an extended period of time based on the condition of the equipment. This is a typical inspection task, vibration analysis task or oil analysis task in order to monitor condition.

 - Proactive maintenance or engineer out maintenance (EOM), defined as maintenance or task performed to prevent maintenance as well as failure. It also involves the development of new facilities or changing of existing facilities. Updating or putting new procedures in place is also a form of EOM.

- Breakdown maintenance, defined as that maintenance which was unforeseen and is necessary to restore the serviceability of the physical asset.
- Project maintenance, defined as that maintenance which involves the development of new facilities or changing of existing facilities. The minimum preventative maintenance to be effected as per agreement with GRDM which details the tasks and the frequency they are to be performed. The preventative maintenance is performed to prevent failures. The Contractor will be held liable for the repair of any failure, if the Contractor failed to identify the failure condition on the maintenance report and notify the contract supervisor for the necessary corrective maintenance authorisation. Therefore, the Contractor should include any further preventative maintenance recommendations, which in his opinion are necessary for the specific and other failure prevention.

Extent of the works:

- The service provider will be fully responsible for meeting all requirements in this document regarding the Works.

In addition, all Works will be carried out to the standard and frequency as required by the Original Equipment Manufacturer (OEM) and Maintenance and Engineering working procedures, as well as any applicable governing law and/or regulations. Service and maintenance shall be carried out as per agreed work schedule & frequency and work instructions (e.g. attending to technical helpdesk logged calls).

- All new installation, replacement and repairs must be approved by GRDM prior to works being carried out.

The work will be done for the following systems /fittings categories:
