increase

General points:

1. From 1 April 2021, only official, provincial data will be submitted for the JOC.
2. From the available data, we remain in a good position currently.
3. There has been a welcome decrease in active cases per 100 000 for all sub-districts, except Hessequa. But not of concern - small numbers.
4. Sub-districts do go up and down with new numbers, but the overall trend is stable.  
There is no area of major concern.
5. George Hospital: 23% use of general Covid beds (down from 43% last week) and 4% of critical care beds (down from 13% of last week). All district hospitals manageable presently and not under pressure.
6. Focus at moment is planning and implementation of the vaccination campaign: Phase 1A.  
George Hospital has implemented the vaccination program. It is the only designated site in Garden Route for now.  
Busy planning for Phase 1B: decentralized venues in sub-districts where balance of health care workers will be vaccinated.  
Thereafter there will be Phase 2 and Phase 3.  
No registration process yet in place for Phase 2 nor for Phase 3  
Formal communications will be done as soon as clarity on these phases.
