| Quarantine | 1 |
| Isolation | 26 |

- There is a significant increase in new cases with a big increase in the active/100 000. This is for all Local Municipal areas, except Hessequa, which remains stable.
- The main changes are seen in Bitou, Knysna and especially Mossel Bay.
- For Bitou and Knysna, it is mainly the private sector, and for Mossel Bay, it is mixed. There have been two big clusters in Mossel Bay, one relating to a birthday party and the other to a funeral - family members affected.
- The George Hospital stable at the moment. Covid ward 19% full and High Care 13% full.
- All district hospitals manageable presently and not under pressure. Some of the private hospitals starting to see an increase in admissions again.
- The focus at the moment is planning and implementation of the vaccination campaign: Completion of Phase 1 and start of Phase 2.
- Up till now, a total of 7 561 vaccines have been given. This includes the public and private sector.
- Ongoing support is requested from municipalities to support registration of the 60s
