- There is a 23% district increase in new cases over the last 7 days compared to 7-14 days ago;
- All local municipal areas had large increases except for Bitou and Knysna which decreased, and Kannaland which remained unchanged;
- This is a significant deterioration of our district's position, but it does mirror what is also happening in the rest of the province; and
- The new cases are widespread, however there are many small clusters of cases, especially in households and also in schools.
