THE GEORGE INTEGRATED PUBLIC TRANSPORT NETWORK (GIPTN)

- The GIPTN has been operational since December 2014. The project has made significant strides in transforming public transport in George and the socio-economic benefits are starting to be realized at the scale required of such a large public investment. It currently provides access to over 60% of households in George and covers 87% of George urban area. This amounts to 13,000 passenger trips currently per day on scheduled, reliable, affordable services.
- The Department jointly manages the George Integrated Public Transport Network (GIPTN) with the Municipality of George. The GIPTN includes a bus service, known as GoGeorge, which provides scheduled, reliable, safe, and affordable public transport services to the people of the George. To date, Phase 1, 2, 3 and 4B are operational and the service transports about 14,000 passengers per day. The service is cashless, and payment is made by smartcard.

THE GEORGE INTEGRATED PUBLIC TRANSPORT NETWORK...CONTINUED

• The Department is currently focused on rolling out Phase 4A, which will be the largest phase in the network (i.e., will have the highest passenger volumes) and will serve the area of Thembalethu.

THE GEORGE INTEGRATED PUBLIC TRANSPORT NETWORK...CONTINUED

Challenges

- The economic impact caused by COVID has reduced fare revenue however there is an indication of recovery. As part of Covid-19 preventative measures, only smartcards are accepted on the bus. This is being monitored in terms of impact on fare revenue. Furthermore, some major challenges remain in terms of unlocking the even larger potential benefits of this system.
- The roll-out of the Go-George services to Thembalethu and the significant further investments now
 required in road and public transport infrastructure means that decisive and visionary leadership is
 now required to unlock the full potential of the project for the George community in the years to
 come.

2021/22 BUDGETED PROJECTS FOR GARDEN ROUTE

ROAD SAFETY AWARENESS

- The Department will continue to implement several road safety awareness initiatives across the District through Programme 4 Transport Operations.
- These include awareness and promotion initiatives at roadblocks on national and provincial roads during busy periods of the year, including over the easter weekend and the festive season. These aim to raise awareness about fatigue, driving under the influence and other relevant road safety issues.

RED-DOT TAXI SERVICE

• The Red Dot Taxi Service is operational in the Garden Route District. The ongoing support offers patients transport to and from Q&I facilities as part of the departments Covid-19 support to the DoH. Discussions are underway to continue support through the third wave for a possible extension of up to 6 months. The current contract expires at the end of May.

BLUE DOT TRANSPORT SERVICE

- Due to the success of the Red-Dot initiative, the Blue Dot MBT transformation programme was launched by the Premier on the 4th March 2021. The pilot programme has been officially rolled-out and is operational since 15 May 2021 with driver training and vehicle fit-out underway.
- There are currently 50 vehicles within the Plettenberg area.
- At its core, the Blue Dot taxi service will be a voluntary, rewards-based programme that leverages technology and incentives to shift behaviour and transform minibus taxi services. Partnering with the taxi industry on this project, we aim to create a safe, reliable, dignified and affordable public transport which will also create economic opportunities and jobs.

2021/22 BUDGETED PROJECTS FOR GARDEN ROUTE

EXPANDED PUBLIC WORKS PROGRAMME (EPWP)

The Department will continue to provide technical support and facilitate provincial coordination and monitoring of EPWP activities within the Garden Route District. The programme aims to draw significant numbers of unemployed people into productive work accompanied by training. EPWP must not displace existing permanent jobs and opportunities must be based on real demand for services.

CONTRACTOR DEVELOPMENT PROGRAMME

The department will be undertaking the following Contractor Development engagements within the district:

- DTPW will be holding a 5 week training Programme in Garden Route for Grade 1 -3 Contractors. (Town TBC)
- Depending on COVID restrictions DTPW would like to conduct a 2 day Contractor Information Session (CIS) (Town TBC)
- DTPW will also be offering various short courses in either, Enterprise Development or Health and Safety, depending on the need in your District.

BURSARY PROGRAMME

- Schools offering mathematics and physical science within the District are pre-identified and visited and/or contacted to share and promote the bursary opportunity. A schedule may be provided if required.
- The Masakh'iSizwe Team participates in platforms such as the CCEA (Cape Careers Exhibitors Association) which facilitates exhibitions in the WC districts where schools gather in a central venue, providing opportunities to engage with scholars, parents and teachers. Targeted schools who might not attend the exhibitions will be visited by our marketing officer once approval is obtained from WCED. Furthermore, all WCED district Directors are provided with bursary information which is filtered down to schools. Local libraries, municipalities, FET colleges as well as Thusongs centres are all furnished with marketing material as well.
- The bursary programme is also marketed in the below social media platforms: Twitter, YouTube, Facebook and the Western Cape Government Website. In 2021, there is a proposal to market the programme in local community radios and local newspapers with the help from the communication component.

Thank you
