**Health Certificate for Barbers, Hairdressers and Beauticians**

**(1) No person may operate as a barber, hairdresser, beautician, body piercer or tattooist, and no barber, hairdresser, beautician, body piercing or tattooing salon may be operated without a health certificate issued by the Environmental Health Practitioner.**

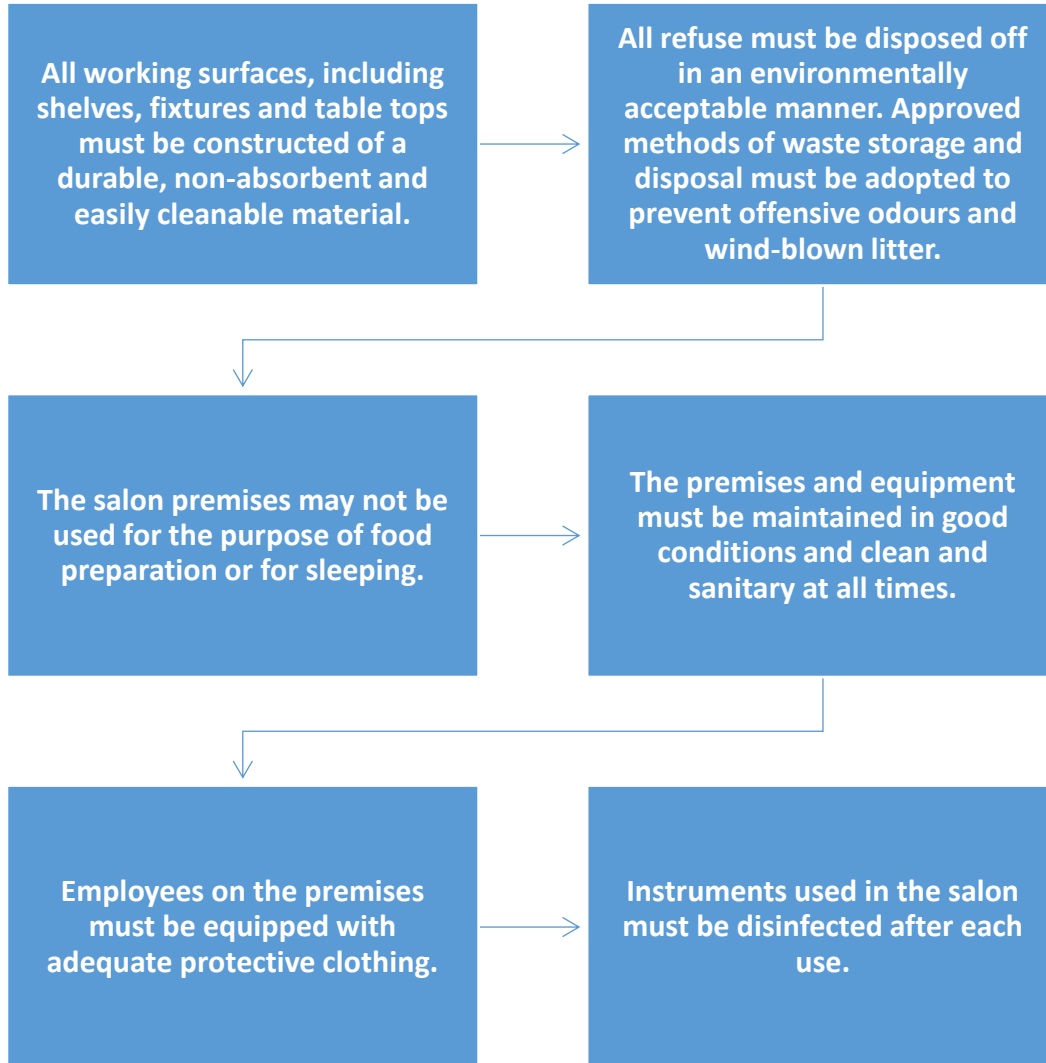

**How and when do you get a Health Certificate?**

**You will apply at Garden Route District Municipality offices for a Health Certificate. An Environmental Health Practitioner will then only issue this certificate when the premises complies with the health requirements as set out in the By-Laws of Garden Route District Municipality .**

# HEALTH REQUIREMENTS

# HEALTH REQUIREMENTS

# CLEANING AND DISINFECTING INSTRUMENTS

Instruments that come in to contact with the customer, need to be sanitized before reusing. This includes blades, shears, combs, and so forth, which should be thoroughly washed in hot, soapy water to remove film, oil and debris,. Lastly the combs and other instruments are placed in 70% alcohol or a barbicide solution for disinfection.

Methylated spirits is not an effective cleaning solution and using it instead of a proper alcohol or barbicide solution is not recommended.

# HYGIENE

- All cut hair must immediately be swept up and placed in a covered refuse bin.
- The cape the client used, and the chair must be thoroughly cleaned before the next person uses it.

- Provide an adequate supply of clean towels with suitable storage for your clients.
- Do not use the same towel on different customers, one customer must have one towel.

# Infections/Diseases due to unhygienic practices

- Barbers Itch (Folliculitis)
  - When an instrument is not sterilised, the bacteria can enter the hair follicles and cause red bumps/pimples.

# Infections/Diseases due to unhygienic practices

- Tinea Capitis
  - This is a fungal infection that looks like a ring worm.
  - It spreads via poorly sanitized combs and towels.
  - It can even lead to permanent scars and hair loss.

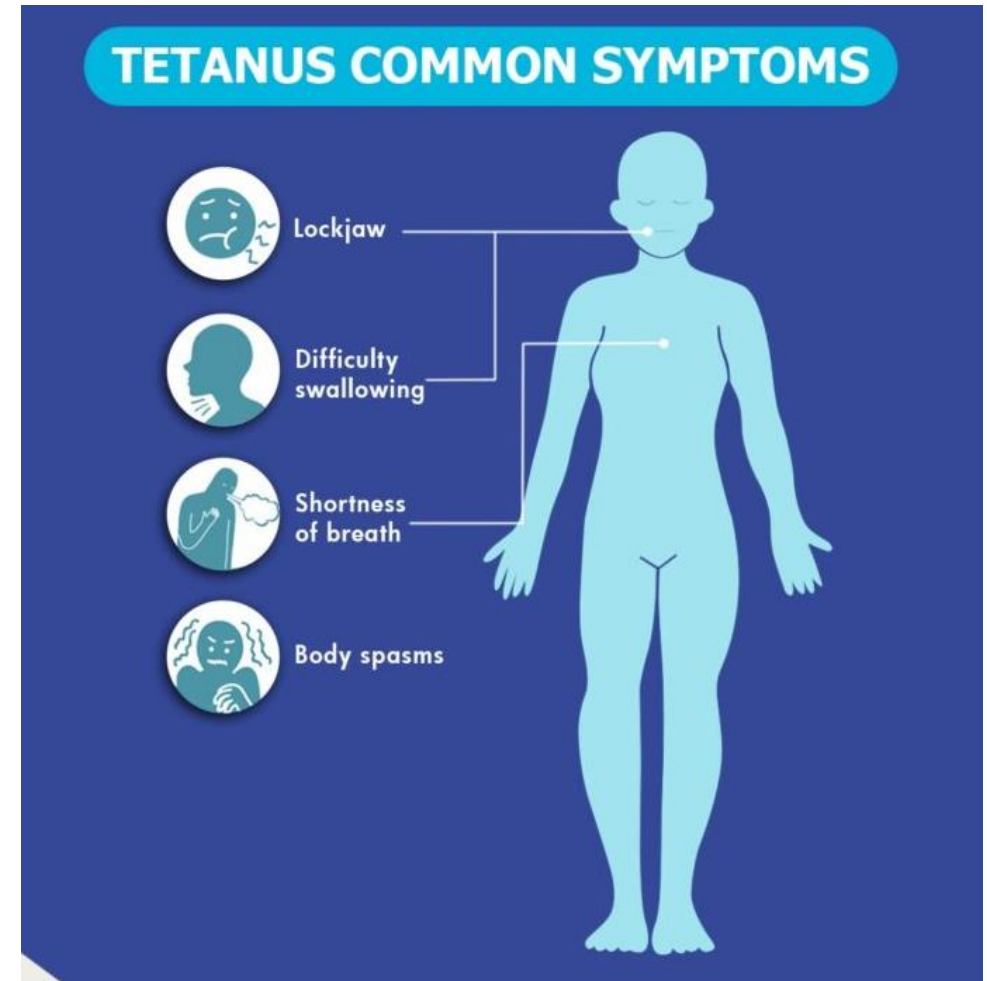

# Infections/Diseases due to unhygienic practices

- Impetigo
  - This is a bacterial infection that causes yellow crusts on the skin.
  - It spreads via skin to skin, clothing and towels.
  - In barbers/hair salons, it is caused by dirty towels.
  - It is highly contagious.

# Infections/Diseases due to unhygienic practices

- Tetanus
  - This is an bacterial infection.
  - It spreads by using rusted razor blades.

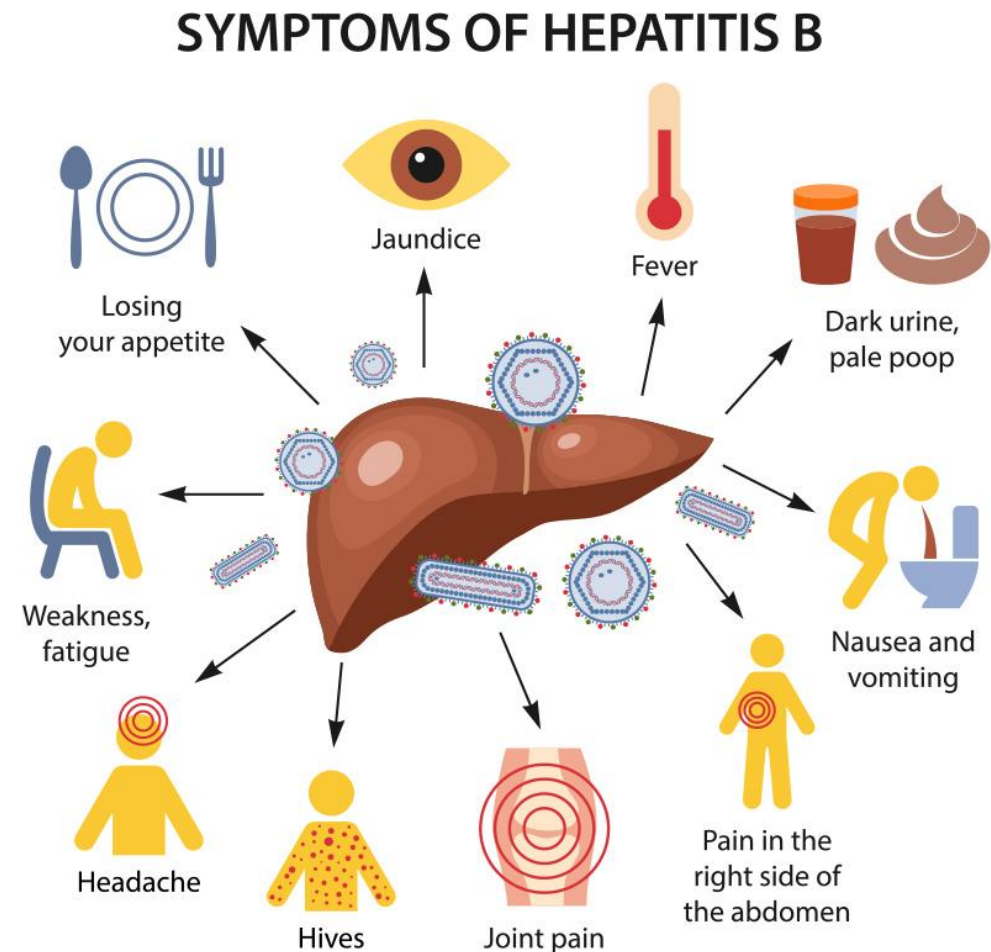

# Infections/Diseases due to unhygienic practices

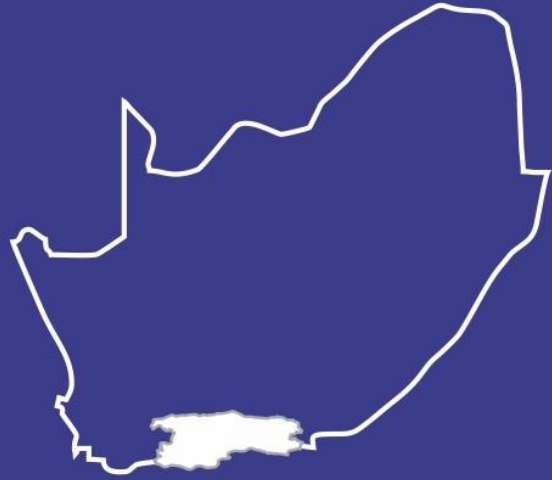

- Lice
  - Insects that are on your scalp or beard that cause severe itching.
  - It spreads via poorly sanitized combs and brushes.

# Infections/Diseases due to unhygienic practices

- Hepatitis B
  - It is an infection of the liver caused by the hepatitis B virus.
  - It spreads when you are cut with razor blades that contain blood from an infected person and was not sterilised before being used on the next person.
