C.3.7	Grounds for rejection and disqualification

TENDER NOTICE

Jou roete na vooruitgang • Indlela yakho eya empumelelweni • Your route to prosperity

The Standard Conditions of Tender standardize the procurement processes, methods and procedures from the time that tenders are invited to the time that a contract is awarded. They are generic in nature and are made project specific through choices that are made in developing the Tender Data associated with a specific project.

Conditions of tender are by definition the document that establishes a tenderer's obligations in submitting a tender and the employer's undertakings in soliciting and evaluating tender offers. Such conditions establish the rules from the time a tender is advertised to the time that a contract is awarded and require employers to conduct the process of offer and acceptance in terms of a set of standard procedures.

The CIDB Standard Conditions of Tender are based on a procurement system that satisfies the following system requirements:

Requirement	Qualitative interpretation of goal
Fair	The process of offer and acceptance is conducted impartially without bias, providing simultaneous and timely access to participating parties to the same information.
Equitable	Terms and conditions for performing the work do not unfairly prejudice the interests of the parties.
Transparent	The only grounds for not awarding a contract to a tenderer who satisfies all requirements are restrictions from doing business with the employer, lack of capability or capacity, legal impediments and conflicts of interest.
Competitive	The system provides for appropriate levels of competition to ensure cost effective and best value outcomes.
Cost effective	The processes, procedures and methods are standardized with sufficient flexibility to attain best value outcomes in respect of quality, timing and price, and least resources to effectively manage and control procurement processes.

The activities associated with evaluating tender offers are as follows:

- Open and record tender offers received
- Determine whether or not tender offers are complete
- Determine whether or not tender offers are responsive
- Evaluate tender offers
- Determine if there are any grounds for disqualification
- Determine acceptability of preferred tenderer
- Prepare a tender evaluation report
- Confirm the recommendation contained in the tender evaluation report

**MBD 9****CERTIFICATE OF INDEPENDENT BID DETERMINATION**

1. This Municipal Bidding Document (MBD) must form part of all bids¹ invited.
2. Section 4 (1) (b) (iii) of the Competition Act No. 89 of 1998, as amended, prohibits an agreement between, or concerted practice by, firms, or a decision by an association of firms, if it is between parties in a horizontal relationship and if it involves collusive bidding (or bid rigging).² Collusive bidding is a *pe se* prohibition meaning that it cannot be justified under any grounds.
3. Municipal Supply Regulation 38(1) prescribes that a supply chain management policy must provide measures for the combating of abuse of the supply chain management system, and must enable the accounting officer, among others, to:
 - 3.1 take all reasonable steps to prevent such abuse;
 - 3.2 reject the bid of any bidder if that bidder or any of its directors has abused the supply chain management system of the municipality or municipal entity or has committed any improper conduct in relation to such system; and
 - 3.3 cancel a contract awarded to a person if the person committed any corrupt or fraudulent act during the bidding process or the execution of the contract.
4. This MBD serves as a certificate of declaration that would be used by institutions to ensure that, when bids are considered, reasonable steps are taken to prevent any form of bid-rigging.
5. In order to give effect to the above, the attached Certificate of Bid Determination (MBD9) must be completed and submitted with the bid:

¹ Includes price quotations, advertised competitive bids, limited bids and proposals.

² Bid rigging (or collusive bidding) occurs when businesses, that would otherwise be expected to compete, secretly conspire to raise prices or lower the quality of goods and / or services for purchasers who wish to acquire goods and / or services through a bidding process. Bid rigging is, therefore, an agreement between competitors not to compete.

6.1 Pumps and mechanical systems

Plumbing or water-related installations and equipment should be serviced and repaired strictly in accordance with manufacturers' specifications, instructions as well as codes of good practice.

Below is the breakdown of infrastructure and conditions where these pumps are operational:

The pump inventory of the resorts broadly consists of the following:

- Submersible pumps (boreholes)
- Swimming pool pumps
- Hot & cold-water pumps
- Above-ground pumps
- Sewerage pumps

Calitzdorp Hot Spring Spa: The main water supply originates from two boreholes on the premises. This water is transferred into a large reservoir by means of submersible pumps from which it gravitates to all the sections of the resort.

The hot mineral water is transferred from the source (at a temperature of 52°C) to three swimming pools by means of three individual pumps. The hot mineral water of the three pools is recycled and collected in the old swimming pool. From there it is pumped to two other reservoirs to be utilized for irrigation purposes by means of gravitation.

Water Quality:

The hot mineral water, 52°C at the source, and abnormally high iron content have an adverse effect on the pump equipment.

De Hoek Mountain Resort: The main water supply comes from the river from which water can be utilized according to a water schedule.

Water Quality:

Fresh water contains no known chemicals that effects pumps. Natural contamination poses a challenge.

SERVICE PROVIDER RESPONSIBILITIES FOR PUMP REPAIRS:

Repairs and Servicing: Perform ad-hoc and emergency repairs, which may include complete overhauls and assembly.

Component Management: Inspect and maintain seals, gaskets, valves, pipework, filters, strainers, and bearing lubrication.

Diagnostics: Diagnose pump issues (e.g., unusual noises, vibration, leaks) and propose cost-effective solutions.

Logistics: Collection, transport, assessment, repair, and delivery of damaged pumps to and from the workshop when necessary.

TENDER NOTICE

Jou roete na vooruitgang • Indlela yakho eya empumelelweni • Your route to prosperity

Testing: Pressure and flow rate testing to ensure operation within specified parameters, including running tests at a workshop with a proper pump bay if required

6.2 Electrical Systems

SERVICE PROVIDER RESPONSIBILITIES FOR ELECTRICAL REPAIRS:

Repairs and Replacements: Repair all electrical equipment and infrastructure including faulty wiring, damaged components (e.g., bulbs, switches, plugs, circuit breakers, distribution boards), and install new power supplies including gate motors as and when needed.

Troubleshooting / Fault finding: Perform fault finding on electrical connections, control panels, and other various electrical components using appropriate testing devices.

Compliance: Ensure all electrical systems and installations comply with Occupational Health and Safety (OHS) Act 1993 (Act no 85 of 1993) and the SANS 10142-1 standard.

Emergency Response: The service provider must respond to emergency electrical failures on a call-out basis within 1 to 2 hours of receiving a call to local properties (within 30 km radius) from their local office and 3 to 4 hours to a property beyond a 30 km radius from their local office.

Certification: Be able to issue valid Certificates of Compliance (CoC) for all relevant electrical work completed.

7. OCCUPATIONAL HEALTH AND SAFETY ACT OF 1993

All regulations and statutory requirements in terms of the latest edition of the Occupational Health and Safety Act, 1993 (Act no 85 of 1993) shall be adhered to.

8. METHOD OF WORK ALLOCATION AND DELIVERY TIMELINES

Service providers will be required to be readily available to carry out specific work as and when required for the duration of the contract.

- Emergency work will be allocated based on the agreed emergency work schedule between Garden Route District Municipality and the appointed panel members.
- Non-emergency work will be quotation based.
- Claims for travelled kilometres will only be considered for travel undertaken within the boundaries of the Garden Route District Municipality.

All reported non-emergency breakages must be investigated within 12 hours of reporting, and the necessary repairs must be conducted within 24 hours after the approval by the GRDM official.

Service providers must confirm availability during holiday seasons as well as weekends and public holidays including:

- **Easter Holidays**
- **December/January Holidays (15 December to 15 January)**

For the evaluation of the project team, if applicable, at least one of the Project leaders must be an employee with the leading partner of the consortium or joint venture. The leading partner of the consortium or joint venture is determined by the shareholding regarding the liability, which is included in the consortium or joint venture agreement.

If required for the evaluation of the financial ratings, if not issued for the consortium or joint venture specifically, the rating of the leading partner will be used in the assessment.
